

happy that you took the time and effort to assemble those data and information for the benefit of all the participants of the PMCP Golden Anniversary celebration.

We had prayed for this event to happen and we are very glad that it did and you were our honored guests and at the same time hosts.

Who would ever imagine and expect that Vijji would come along? But she did. This only supports our belief that you are true friends of the Filipinos. What kind of character is that, I asked in the beginning of this letter. And it is true, you are our friend, colleague, and brother/sister. That is truly Asian character, the value of being part of the family. We will always remember and treasure your visit and presence and participation in our scientific meetings. We will remember!

I have taken many pictures so that I can refresh myself of the events that we will always remember. I will keep them - my remembrance of two handsome and beautiful friends, they who always inspired me in times of sorrows and in times of happiness.

Read the book of Baby - she wrote the chapters but she passed away before it was ready for printing. I had it organized, hired an editor, and had it printed and launched on her first death anniversary last year.

With best wishes and kind regards,

Santi
